Kaesong Problem

No.

From RALPH WALLING

Pan Mun Jom, Oct. 12. After three days of talking, Allied and Communist liaison officers trying to get the cease-fire talks started again here, still could not lay the ghost of Kaesong.

Kaesong was the site of the talks before they were broken off 51 days ago because of disputes over alleged infringements of the five-mile neutral zone surrounding it by United Nations forces.

CONVICT'S PLEA GRANTED

An American convict on parole has saked to be sent back to prison for life because he is afraid of drinking too much while at liberty—and his request has been granted.

The ex-convict, Samuel McClure Walker, told the Governor, Mr Fielding Wright: "I have become addicted to alcohol lately and when I am drinking I am not responsible for my actions. I fear I may commit fome act that would make me dangerous to myself and to others."

Mr Wright said: "I am convinced that to deny his wishes would be to needlessly endanger the safety of the public."-Reuter.

TIME Ordinance introduced this week into Legislative Council by the acting Attorney-General to bring certain features of Hongkong's common law in line with that of England gives rise to the expectation that, in due course, legislation concerning compulsory third party insurance and a Workman's Compensation Act will also be tabled. Both measures are sensible to a point of necessity. They have for long been in existence in other parts of the world with beneficial effects. The introduction of compulsory third party insurance was advocated as long as three years ago, but a plea was then advanced that it was not really essential in a place such as Hongkong. The argument cannot easily be sustained and we imagine, judging from the acting Attorney-General's remarks last Wednesday, Government is no longer inclined to be persuaded to the point of view. There is no apparent difficulty in drawing up suitable legislation. The English law governing third party insurance can well be used as a basis, with modifications where advantageous, to meet considered

IEUT-GENERAL Sir Robert Mansergh, first man to assume the title of Commander, British Forces, Hongkong, leaves the Colony today to take up an important post under General Eisenhower. With him goes the best wishes of Hongkong for his. continued success as a military strategist and tactician of outstanding ability. Public tribute has appropriately been paid to the General's efforts duri ing the past two years towards promoting and consolidating happy relations between the Services and the civilian population. He can also take credit for seeing that the troops who have been sent to Hongkong in preparation for service in Korea turned out to be so splendidly trained that without exception they have won honour for themselves and

Legislation

purely local requirements and conditions. Few, if any, will dispute the correctness of compulsory third party insurance in principle and its application in Hongkong is overdue. A Workman's Compensation Act would represent another progressive step. While it is true an increasing number of employers are prepared to protect their workers financially in the event of any of them suffering a disability accident during employment, no enforcing legislation exists. Compensation for injuries and disabilities sustained in the line of duty has become an accepted obligation in the enlightened areas of the world and there is no reason why Hongkong, becoming more and more industrialised, should lag behind any longer. If the Colony is effectively to fulfil its role as democracy's shop-window of the Far East it must keep abreast of accepted standards in the way of social and welfare amenities. Government will be giving a proper lead in this direction if, and when, it introduces legislation covering compulsory third party insurance and workmen's compensation.

British Army on the battlefield. Hongkong is particularly interested to observe that its Services chief, has been given the appointment of Deputy Commander-in-Chief of Allied Forces in Northern Europe because he becomes the third senior officer to serve in Hongkong who has been invited to assume a key assignment with General Eisenhower's Supreme Headquarters of Allied Powers in Europe. Hongkong, in consequence, basks in a certain amount of reflected glory. Next February General Mansergh's successor. comes to the Colony. In the meantime, Major-General Evans, already familiar to and with Hongkong, assumes the office, thereby ensuring the effective continuity of a command to which, in these days, is attached more than ordinary importance and significance.

Cubain: La Havane A Paris-Conga;

In the new series "Musical" Note-book", which starts at 9.30 p.m. on Tuesday, Radio Hongkong once again welcomes the Rev. Father T. F. Ryan. S.J., to the microphone. Many listeners will remember previous talks broadcast over the station by this authority on music. In this particular series Father Ryan informally surveys and provides a background to some of the serious music which listeners can hear during the following week. The programmes will be illustrated, as it were, by recorded extracts of the music under review

For those who still mourn the passing of the nonsensically 7.00 "ORCHESTRA OF THE "Much Binding in the Marsh" the BBC offers a new lease of life. The inseparable Richard Murdoch and Kenneth Horne come to the microphone again on Friday at 9.00 p.m. to hand it "Over to You". They are supported, for good measure. by the "Much Binding" confederates Sam Costa, Maurice Denham, and Diana Morrison, and the music is provided by the Dance Orchestra, conducted by Stanley Black, "Over to is relayed direct from London by Radio Hongkong.

Mutual Broadcasting System's correspondent, Cecil Brown, talks about some of his "Saturday ů.n experiences Roundup", which comes at 8.15 this evening.

Expert No. 2 was Sir John Cockereft, famous chief of the Harwell atom research station.

When he arrived at Harwell's counterpart, the magnificent Argonne laboratory sited in a forest clearing near Chicago, he was rigidly excluded from every department working on search weapons.

The scientists who met him had been crdered to show him no secret documents.

Policy

OFFICIAL reasoning behind this discrimination was simple:

The British are doing so well in germ-werfare research that they have plenty to offer in atomic energy they are so hopelessly behind that any interchange would be almost entirely one way.

Almost all the defenceresearch experis I have met here in Washington are strongly opposed to this policy.

They think it is crazy to force Britain to duplicate work which the Americans did five years ago when other projects for the common defence are held up for lack of scientific manpower. But they feel they can do nothing about it for two reasons. The first reason is surprising. Some of the most influential U.S. military chiefs feel that Britain is too vulnerable to invasion to be used as a storewhich an invader could take over and use.

TWO - LIFE SUITS

Another transformation trick comes in the suit with two lives. Wear it as a suit, severely cut in rich materials—one of the new silver lames or bronze and grey flowered lames; or, if a dress is more flitting for the occasion, wear the skirt with a halter-neck blouse top, in black velvet. The line of this type of suit is restrained: the waist is ainy and moulded, hipline stiffened and curved. Other points to notice are the collar, slight basque and loose back pleats.

Paris fashions are already inspiring London designers. Barely six weeks after their appearance in the Paris collections, they are shown in London-in British materials, by British designers. In particular there is the Dior coat line with the broad belt placed high at the back on the yoke, almost shoulder-blade level, and the fullness increasing in magnificent folds beneath it. Jacques Falh's new sleeve style appears on every coat in one is inset deeply in a triangular shape, so that the points of both triangles almost meet in the centre of the back. ▲ NTHONY WEST'S second A movel exhibits the defects of one who feels that, with no undue delay, he must consolidate the success of a first novel (One Dark Night, macabre allegory and publishing success of 1949).

It exhibits, too, West's intuitive acquaintance with human frailty: sin is original and, probably, incurable. And his gift for insinuating, rather than stating, a deeper secondary meaning within his narrative.

Failure of the book (in spite of these qualities) springs from the fact that i's back is broken. West begins by writing one novel, and finishes by writing another.

PANDAS TAKE ON THE JAGUARS IN TOMORROW'S 'FEATURE' MATCH

By "GRANDSTAND"

The Softball programme this week will be highlighted by a pair of "A" Division encounters tomorrow in which the Pandas, still licking the wounds of humiliation inflicted last week, will take on the hustling Jaguars at 11.30 a.m. in an attempt to redeem lost prestige, while the Madcaps tangle with the Canucks at 4.00 p.m.

The "B" Division of the Senior League will also provide plenty of excitement as the hitherto undefeated Navy boys cross bats with the Red Sox as they face their

greatest obstacle in the flag chase.

In the Junior League, The Aces and Blackhawks will square off this afternoon when both teams will be out to oust the other from that select circle of undefeated outfits.

II/ITH the annual bridge championships just about to begin in Washington, D. C., my mind takes me back to the most dramatic hand of last year's tournament. The hand was dealt in the final round of the team championship and played an important part in my team's victory. George Rapee played the South rounds of trump in his own hand and then began the spades. When both apponents followed to the queen and ace of spades, Rapee drew the last trump with dummy's acc. He could then run the rest of the spades, for a total of 13 tricks. In the other room Helen Sobel played the South hand for the other team. The opening lead was the same, and she likewise drew two trumps and began on the spades dummy's ten of spades.

to shut West out. That limited her to three discards on dummy's spades. Eventually she had to try the heart linesse, and she lost the slam when that finesse failed. The curious thing about this dramatic hand is that Mrs Sobel's play, although it looked like a ghastly blunder, was really quite moughtful and was only very slightly inferior on a percentage basis to the winning play made by Rapee.
Her play was safe if West had the jack of spades, or if East held only two spades to the jack, or if East failed to return a spade, or if the heart finesse later won. It was very hard luck to have such

YOUR BIRTHDAY ... BY STELLA

SATURDAY, ÖCTOBER 13

TOORN today, you are one of those natural teachers and leaders of young people. You seem to have an uncanny understanding of their problems and your keen sense of hymour is a saving grace in your capable technique of discipline. Your mind is clear and you go straight to the heart of a problem. You express yourself with equal clarity and you have the kind of judgment which demands respect. In addition, you have infinite patience. The law, as a pro-fession, might have a strong appeal to one of your nature.

You are not as aggressive as you might be and unless you are being constantly pushed into displaying your talents, the world is not apt to know how good you really are. Because of this you may not reach financial success as early as you otherwise might. in fact, you are not too much interested in money-making and can be quite happy with your books, mu te and scholarly pursuits, if weat to someone who is aggressive and ambitious, you would probably make an important mark in the world.

Although you, yourself, may not be an inventor you are always interested in original ideas, and are good at instrumenting them. Progressive in thought and action, y u have an excellent memory and
